DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 6, 2005 has been entered.

Allowable Subject Matter

2. Claims 41-61 are allowed over the prior art.

3. The following is an examiner's statement of reasons for allowance: In the Examiner's opinion, a motor generator system for a hybrid vehicle comprising a motor generator mechanically connected to the crank shaft of the engine, an inverter controlling the motor generator, and a voltage control circuit provided between the battery device and the inverter, wherein said motor generator supplies generated power to said battery device through said inverter, said voltage control circuit steps down and/or up a power generation voltage of said motor generator to form said generated power voltage of said motor generator to reach a charging voltage of said battery device, was not anticipated by the prior art, nor would it have been obvious to a person of ordinary skill in this art. The prior art, specifically Kinoshita et al. ('928) discloses a motor generator system for a hybrid vehicle comprising a motor generator (12) mechanically connected to the crankshaft of the engine (11). However, Kinoshita et al. does not

Art Unit: 3618

disclose wherein said motor generator supplies said generated power to said battery device (14) through said inverter (3). Instead, Kinoshita et al. has another motor (2) that supplies and receives generated power to said battery device (14) through said inverter (3). However, this motor (2) is not mechanically connected to the crankshaft of the engine. Generator (12) in Kinoshita et al. supplies the battery (14) with power through converter (13), and not through inverter (3), as required by claims 41, 48 and 56 of the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
